

STILL MOVING is a LED luminaire, shaded sideways by a filmstrip of either 35 or 70 mm, depending on the size of the lamp. The downward light is dimmable: a wonderful light source for a table, a counter, a hall etc. By standard there is a selection of five color films from the collection of the EYE Filmmuseum in Amsterdam. For the IMAX version there are two extra films. Customizing possible.

The films are a mix of documentary and feature films, from the Netherlands and elsewhere. The story of each movie is summarized in a circulating strip of 35 mm or 70 mm film that is 36 up to 60 frames long.

The film moves along slowly, every minute it transports the 'story' one frame by means of a microcontroller and a stepper motor, so the image of the luminaire changes over time.

Sizes:

35 mm, length 1100 mm and 50 mm wide, 60 frames

70 mm, length 1200 mm and 100 mm wide, 36 frames

70 mm, length 1700 mm and 100 mm wide, 50 frames

Intensity of the (dimmable) light is about 4000 lumen/m
